## Platinum Crucibles and Laboratory Equipment by W. C. Heraeus

Over 150 years of precious metals expertise

W. C. Heraeus has again and again produced innovations, transforming unusual technologies into viable industrial processes, thus developing into an important partner for companies in most branches of industry and research.

The Precious Metals Technology of the Engineered Materials Division manufactures, processes and fabricates for technical applications high-value materials requiring complex processing techniques such as platinum, platinum group metals, gold, silver and their alloys. Laboratory equipment from W. C. Heraeus made from platinum and platinum alloys, such as dishes and crucibles or special equipment for X-ray fluorescence analysis, are well known around the world. Based on our extensive materials expertise we are able to produce complex components, as well as semi-finished products for various industrial applications.

Our Laboratory Equipment Brochure includes:

- Standard Laboratory Equipment
- XRF Programme
- Accessories
- Electrodes
- Precious Metal Semifinished Products
- Crucibles for Cristal Crowing
- Handling Platinum Equipment

On request you can receive our platinum corrosion clock so that you can see at a glance if the used materials work with your platinum equipment or not.
